

LC – FACIL

Meeting MS/I and LC-FACIL

All LC-FACIL partners

Saint Denis, 25.01.2010

LC-FACIL

a working group to facilitate the implementation of integrated, sustainable urban development according to the Leipzig Charter

AN URBACT II PROJECT

European Union
European Regional Development Fund

Connecting cities
Building successes

LC-FACIL – Partner cities

Lead Partner: Leipzig

Rennes Metropole (FR)

Kirklees Metropolitan Council
(UK)

Göteborg (SE)

Vitoria-Gasteiz (ES)

Bytom (PL)

Resigned: Szekesfehervar (HU)

Future partner: Palermo (IT)

Lead Experte: D. Kampus

Steps taken so far

- › **3 Working group Meetings (July, Sept., Nov. 09)**
- › **Start implementation phase: Sept. 09**
- › Interaction with MS/I group
- › First contacts with local/ national networks/ actors
- › **Ongoing work on Workpackage 1**
- › **Feedback and Proposal for Reference Framework**
- › **Start to work / prepare Workpackage 2**

Definition of aims and tasks

- › **Create and promote a common understanding about benefits of integrated urban development policy approaches**
- › **Use monitoring and evaluation - a “reference framework”- as ONE outcome-orientated tool to underline main idea**
- › **Express needs of cities (from practitioners point of view) towards different levels (regional / national / European)**
- › **Further exchange on what is needed for the implementation of integrated approaches on city-level**

Schedule LC-FACIL

	I. Position LC-FACIL how to foster implementation LC	II. Interaction LC-FACIL + and MS/I group
2009	1. WP: Diagnosis + Evaluation	MS/I: Development of RF
01-06/2010	2. WP: Finances + cooperation	MS/I: Finalisation of draft RF
June 2010	First position LC-FACIL	Decision upon RF on Ministerial Meeting
07-12/2010	3. WP: Strategy + Implementation	LC- FACIL (and other cities): Test RF
01-05/2011	4. WP: Rewiew + Re-assessment	Test + Feedback to MS/i
May 2011	Final conference: Results from WPs and Testing phase	

TRANSNATIONAL SCOPING AND EXCHANGE WORKSHOPS WORK PACKAGES

WORK PACKAGES

Workpackage 1: Diagnosis and Evaluation

- › **Qualitative and quantitative indicators are necessary.**
- › **Status quo, development tendencies and strategies (follow-up of objectives) should be observed.**
- › **Comparability between different cities has been discussed – differentiation between global and local indicators possible (example Baro'Metropole Rennes). BUT: necessary to verify that objectives are the same (a shrinking city has different objectives (e.g. on housing market) than a growing city.**
- › **Not too many indicators should be used – differentiation between indicators used for analysis and interpretation, and those indicators used for communication/shown in public.**
- › **The process to build the indicators should be open to be accepted.**
- › **An intelligent interpretation and communication of the outcomes are necessary!**

Workpackage 1: Diagnosis and Evaluation

- › **Next steps: some partners test eXplorer and/or deliver data to Workpackage leader Göteborg to enable a test comparing different cities.**

e.g. with:

- › **General: Data of city borders, number of inhabitants**
- › **Ecologic: waste in kilo per person (if possible differentiated btw. household and commercial)**
- › **Economic: income average (not salary) and/or unemployment rate**
- › **Social: education levels (university level finished)**

Next steps

- › **Meeting with representatives of MS/I group**
exchange and define coming interaction
- › **Ongoing work on Workpackages 1 and 2**
and reference framework documents / proposals
- › **Deepen exchange with other networks, cities**
- › **Next Meeting LC-FACIL: March in Vitoria**

Reference framework-documents

- › **How are the different pieces of RF linked to each other?**
- › **Are there deepened ideas for the typology of the cities?**
- › **What is the function of the interdependencies table – back ground information to be filled in by experts to give suggestions to user?**
- › **Core Model: the use and structure is not yet clear to us**
- › **Assessment tool: the result should not end with a scoring but productively guide to the process and provide advice and good practice**
- › **Leaders dashboard – could serve as a leaders tool / as base for argumentation towards sustainable decisions**
- › **Is there already an approach how to monitor the strategies/implementation/developments?**

Reference framework-documents

› Referring to questioning grid:

Is there a reason why themes of LC and list of sustainability criteria has been abandoned?

How are the questions supposed to be incorporated and treated in the assessment tool?

Linkages/interdependencies are crucial and will certainly be added later?

Differentiation between assessing different territories/scales?

Proposal for assessment tool

Connecting cities
Building successes

Sustainable Development Assessment diagnostic tool: Where am I now?

Each of the following questions has been designed to help identify your starting point from a variety of perspectives. As such we have designed these questions as a series of statements that might best describe your position. 1. Download the tool to your

Pillars	Theme	Aspect	A	B	C	D	Answer
Management / Governance	<i>Planning</i>	<i>Baseline Evidence</i>	We consciously use a selection of strategic indicators that cover the full spectrum of sustainability, with particular emphasis on the organisation's key areas of impact. We have a dedicated resource for interpreting and analysing local intelligence.	We collect and interpret various types of social, economic and environmental data. We have some resources for interpreting and analysing local intelligence.	We collect data on a number of areas of sustainability such as broad economic performance, demographics and waste management. People from various departments collect the data, however there is no over-arching responsibility assigned for the process as a w	We do collect some information such as population statistics etc. We have no dedicated statistical analysis function within the organisation. Questions related to future work

- › **When/how is LC-FACIL going to test and what of RF?**
- › **Who is receiving and reviewing our results?**
- › **How is the long-term maintenance of the tool?**
- › **Who owns it?**
- › **Exchange during coming months?**

Thank You
dziękuję
Merci
