

Experimenting with tech and digital tools

Cities doing it for themselves

Ask your questions on slido.com

Sli.do code: #UCF22

The screenshot shows the Slido Q&A interface. At the top, there is a teal navigation bar with a menu icon, the text 'Experimenting with...', a 'Q&A' tab, a 'Polls' tab, and a red 'A' icon. Below the navigation bar, the event details are listed: 'UCF 2022 Day 2 - Onsite', 'Jun 15, 2022', and '#UCF22'. On the left side, there are three interactive options: 'Live interaction' (selected), 'Switch event', and 'Dark mode' (with a toggle switch). Below these is an 'About Slido' section. In the center, there is a text input field with a red 'A' icon and the placeholder text 'Type your question'. Below the input field, there is a circular icon with two silhouettes and a question mark. Underneath this icon, the text reads 'There are no questions asked yet.' and 'Ask the first one!'. At the bottom right, there is a blue circular button with the text 'Ask'. At the bottom left, there are links for 'Login as admin - Present mode', 'Acceptable Use - Privacy Policy', and 'Privacy Preferences'.

Experimenting with tech and digital

Showcase of small and medium sized towns using digital and tech solutions, tools and techniques to get things done.

- Quick intro through TechPlace
- iPlace – showcasing local impact from Hackathon experience
- ASToN – Bamako experience through new way of working with start-ups
- DigiPlace – making digital inclusive
- ActiveCitizens – digital tools at the service of participatory democracy
- Panel discussion

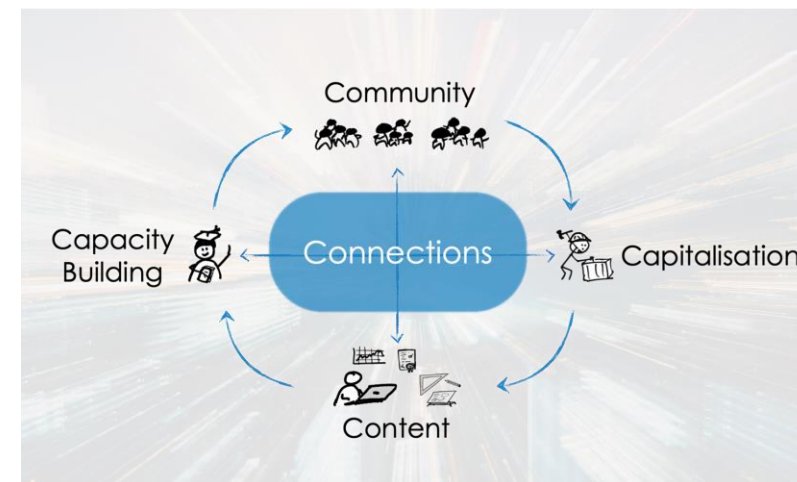

TechPlace

A space for anyone interested in tech and digital for social good in cities

- Connects anyone working with or around digital and tech in cities of all sizes, including smaller cities
- Not just about tech or just for people with extreme digital expertise
- Explore HOW to make digital transition work *for* cities and *for* citizens in a very practical sense
- Policy, implementation, participation, success stories, practical challenges

www.techplace.online

Cities doing it for themselves

How are cities experimenting with digital and tech solutions, tools and techniques used by tech companies in order to address local challenges and improve public services?

What was the local impact from the experience?

Experimenting with tech and digital

We are looking forward to your questions!

A new tax collection system for motos

City of Bamako (Mali)

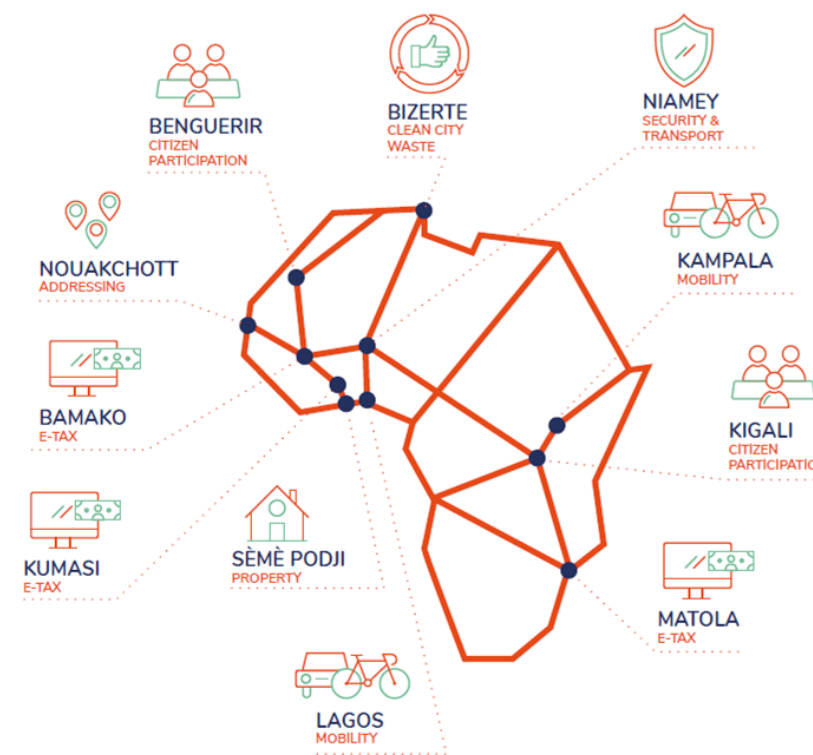

A new tax collection system for motos

Let me introduce you to Hamadou Yalcouye!

Bamako, Mali – the context

- 2019: 3mill inhabitants (50% growth in the last 10yrs); 57% of population < 20yrs;
- limited decentralisation process & capacity to implement projects in an autonomous way;
- digitalisation is not officially a competence at local level, but can be used for basic services and the modernisation of the local administration;
- poor digital maturity of the Municipality: no digital strategy, limited tech infrastructure, no website or pro email, no internal server or management system, no internet or intranet service.

A tax collection system for moto vignettes

Why?

- the main financial source of income for the city (in 2019 – 4 times more income than from any other tax); a tax that was 100% managed by the City Hall;
- an existing informal system, many intermediaries, queues for payment, problems in case of loss.

What?

- an online platform where citizens can register for the annual vignette (1 per bike owned), pay for it with mobile money, print or save the vignette QR Code;
- back-office interface for processing the payments.

Where are they now?

- platform being tested by various categories of users (admin, citizens, local group members);
- beta version ready to be rolled out
- next tax collection period: Jan-March 2023

A new tax collection system for motos

Why is this important?

- new working method with the start-ups through the Local Group (ideas, solutions and validation process);
- continuous learning process from the tests (number of bikes per user, daily follow-up of entries) and enabling of an accurate and updated database.
- new working ways inside the city administration (ADR, Municipality - Finance, Taxes, General Secretary, Police);
- and better understanding of the internal processes and roles of each stakeholders.

THANK YOU!

Is Digital inclusive ?

Including every citizen in the digital revolution

Is Digital inclusive ?

Context

Speed-dating Saint-Quentin

- In Aisne Département (total pop' 540,000) - Saint-Quentin is the largest city (53,000)
- Unemployment is quite high, currently at 13.2% but falling last five years
- Part of larger Agglomération: 39 municipalities, total population of 85,000
- University in the city has around 2000 students

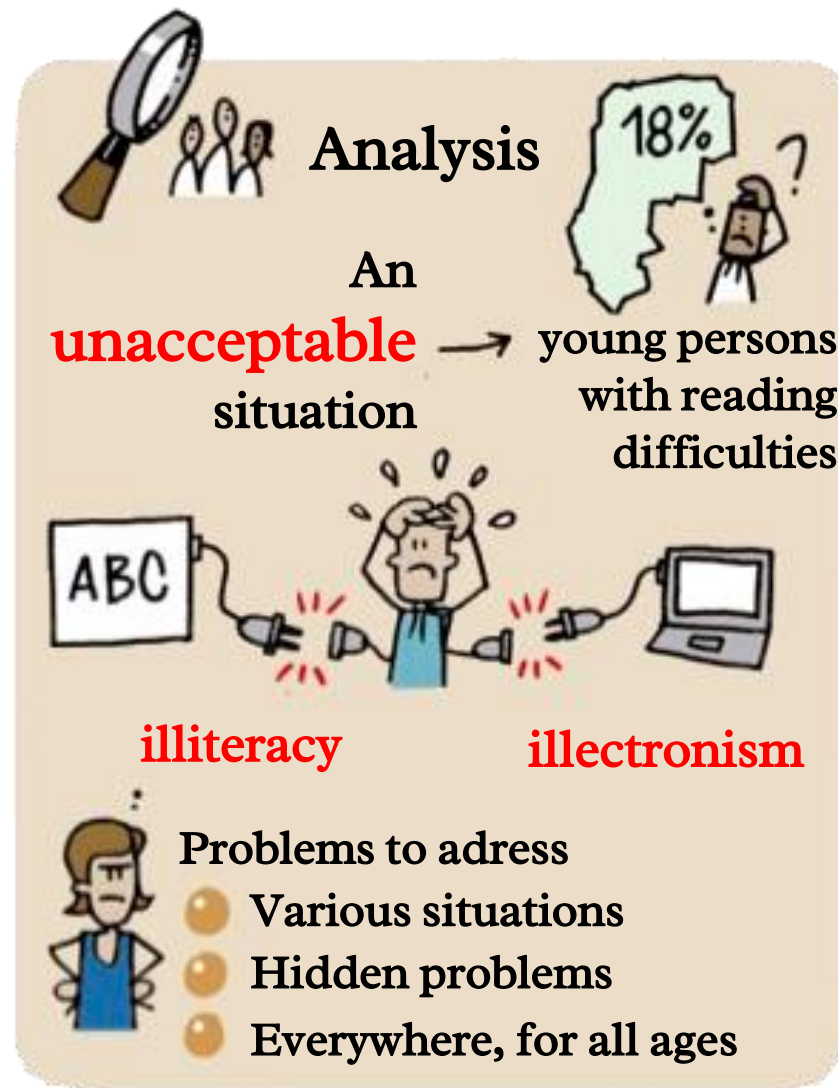

Is Digital inclusive ?

Context

Digital administration

- 15% of the Aisne inhabitant suffer from digital illiteracy (Illectronism).
- In France 67% of the population made an administrative formality online during the last year. One third of them gave up because of a lack of digital skills.

Is Digital inclusive ?

Online elections

23 Neighborhood Councils in Agen

9 members elected by their neighbors

6 years mandate

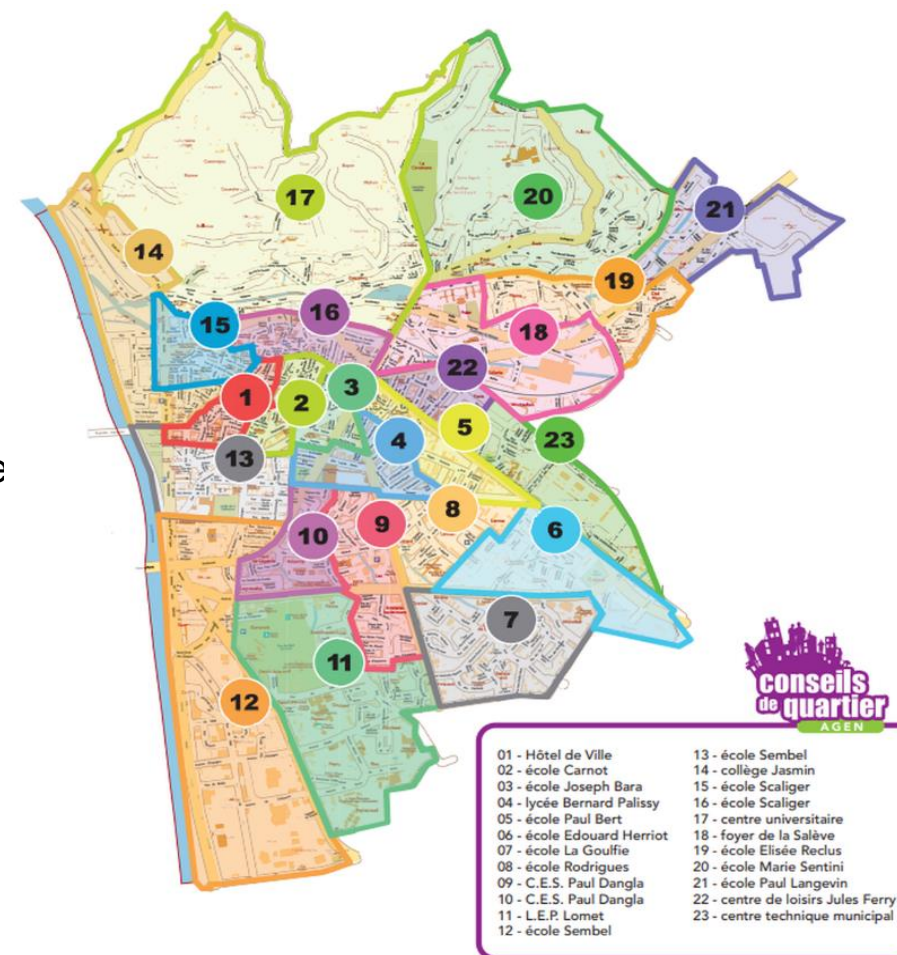

Budget of 375 000€ dedicated to neighborhood improvements (roads, pavement, square...) for the mandate

Online elections that boosted the participation after 3rd time process :

2009 : 23% - 2014 : 16% - 2021 : 22%

People had the choice between voting online or voting by postal vote.

40% voted online and 60% voted by postal vote.

Tell My City

Application for the citizens of Agen since 2018

Citizen can alert the departments about problems they could be faced with in the city.

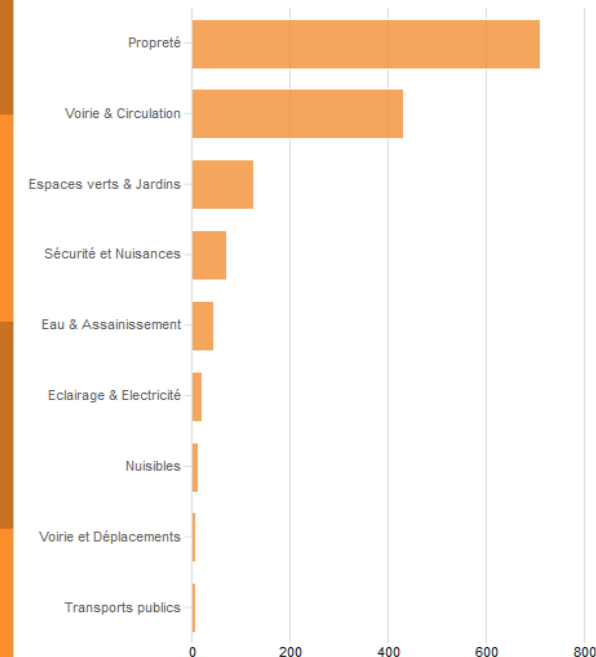

First year : about 2000 reports processed, average of 45/week.

Today : over 3000 reports processed, average of 60/week.

Works because it is dedicated to only one topic.

With a response time of 72 hours, the application still needs to have human beings behind.

Distribution of reports by category

Mind the Digital Gap

Digital tools can be vector of inequality between citizens

Some citizens have issues with new digital tools, they still need paperwork.

Young generation are very strong with Social networks (Instagram, Tik Tok...), but have also difficulties when it comes to administrative matters.

Digital tools are useful, but they can't be the only alternative.

Citizens are still in demand of human beings to talk to within the administration, even more since the pandemic situation.

Thank you for your attention !

Panel discussion

Feel free to engage through Q&A on Slido

...continue the conversations

Today – 14:45 – 15:45 – *HOW TO* session – Agile City Leadership – How to work smarter and respond to your city's needs

Tomorrow – 8:30 – 12:30 – *Breakout* session – The TechPlace 'Tech – Free' Hackathon
